Project

Project	Country	Sector	Partners
Agrobusiness in Algeria Reinforcing the innovation eco-system and sustainability in the agricultural and agrifood sector	Algeria	Agriculture	
Agri-food industry Supporting the agricultural output through farming and rural development in the mountain areas		Agriculture	
Climate Action – Support the implementation of the Paris Agreement Mitigating greenhouse gas emissions and improving the capacity to adapt to the negative effects of climate change		Environment / Climate	
Support development of renewable energy and improvement of energy efficiency Promoting the use of renewable energy and the development of a sustainable management of resources, notably hydrogen		Energy	
Food and resilience facility Building resilience towards food shortages due to climate change or food price spikes, by increasing and modernising cereal storage and logistics infrastructure	Egypt	Agriculture	
Mobile Broadband Rollout Expanding the capacity of the 4G broadband network, deploying around 2 000 new sites and improving coverage in selected regions, as well as upgrading the mobile core network		Digital	
Alexandria Regional Electricity Control Center Renovating the control building and upgrading the communication systems between the transmission network's electrical substations		Energy	
GREGY submarine electricity interconnection Building a 950 km long submarine cable to connect the electric power systems of Egypt and Greece for the transmission of clean energy produced from renewable sources in Egypt		Energy	
Electricity Grid Reinforcement Expanding and upgrading the ageing transmission and distribution network, including the connection of new loads and the reduction of grid losses		Energy	
Unplanned Areas Upgrading and Employment-Enhancement Programme Implementing labour intensive small infrastructure projects, green initiatives, microfinance to SMEs, business development services and capacity building measures		Environment / Climate	
Ventures Programme Investing in start-ups in the fintech, energy access and agritech sectors and providing expertise to improve business operations and invest in inclusive business models		Private Sector	
Nasira Financing Facility Supporting local banks to lend to people usually considered as too risky, like youth, women and migrant entrepreneurs		Private Sector	
Loan for SMEs and mid-caps Providing financing for the projects undertaken by small, medium and mid-cap enterprises across Egypt, addressing the increased needs during the COVID-19 period		Private Sector	
Green Sustainable Industries Fostering sustainable development in Egypt by addressing industrial pollution sources, as well as assisting industry in complying with the national environmental regulations		Private Sector	

Project

Project	Country	Sector	Partners
Private sector development for the Sustainable Development Goals Finance in Common - boosting sustainable finance for small businesses, focusing on climate and gender investments	Egypt 		 
Financial inclusion programme Providing support to SMEs focusing on staff training and skills development, accompanied by loans			 
Improved e-mobility through electric taxis Enabling the leading transport provider, Abou Ghaly Motors, to purchase 250 electric vehicles for taxi services			 
Urban Transport Infrastructure Development Investing in urban rail schemes, in particular investments in the rehabilitation and expansion of metro and tram systems in Alexandria and Cairo			 
Tanta-El Mansoura-Damietta Railway Upgrading the 118 km Tanta-El Mansoura-Damietta railway line, including the doubling of the section El Mansoura-Damietta, re-signaling of the whole line and a freight link to Damietta port			 
Gabal Asfar wastewater treatment plant – Stage III Enhancing capacity and benefitting extra population through 1 million m3 of additional disposed water			 
Helwan wastewater treatment plant Promoting an efficient and sustainable wastewater treatment, reducing pollution and facilitating safe reuse of treated water for agriculture			 
Fayoum wastewater treatment plant Increasing wastewater treatment capacity for 86% of the rural population in Fayoum, contributing to depollution of Lake Qarun			 
Strengthening protection and resilience of refugees, asylum-seekers and migrants in vulnerable situations Strengthening protection and resilience of target groups by facilitating access of vulnerable migrants, asylum-seekers and refugees to basic services in health and education, improving livelihoods and supporting child protection measures, in addition to institutional capacity building towards the adoption of the new asylum legislation			
Reinforcing operational capacities for effective border management at land and at sea Enhancing the capacities of the Egyptian Coast Guard and Border Guard to manage migration flows effectively, by providing border management equipment, as well as targeted trainings			

Project	Country	Sector	Partners	
Improving cybersecurity through TAIEX Advising the National Cyber Directorate to better understand EU Member States' experience in implementing the different regulations concerning cybersecurity	Israel			
Enhancing the telecommunications market through Twinning Strengthening the regulatory capacity of the Ministry of Communications to ensure the continued development of a competitive regulatory climate				
Exhibition and education centre at the Yad Vashem, the World Holocaust Remembrance Centre Creating a new immersive audio-visual experience in the exhibition and education centre in the Valley of the Communities at Yad Vashem, the World Holocaust Remembrance Centre				
Northern Eastern Green Corridor Substation Reinforcing high voltage electricity backbone network by expanding the grid's capacity by an additional 1 000 MW, replacing present and future fossil-based consumption	Jordan		  	
Energy efficiency in wastewater treatment plants Improving energy efficiency of wastewater treatment plants across the country by exploiting their biogas potential			 	
Green Economy Supporting sustainable and efficient production and consumption patterns in the industrial sector and establishing the Marine Park Research Centre in Aqaba				
Solid waste management Ensuring the continuation of essential solid waste management activities in the refugee camps of Za'atari and Azraq				
Ventures Programme Investing in start-ups in the fintech, energy access and agritech sectors and providing expertise to improve business operations and invest in inclusive business models				 
Enterprises Resilience Facility Financing eligible SMEs and mid-caps, contributing to economic resilience, employment-generating activities and alleviating the economic burden of COVID-19			 	
Nasira Financing Facility Supporting local banks to lend to people usually considered as too risky, like youth, women and migrant entrepreneurs			 	

Project	Country	Sector	Partners	
Aqaba electric buses Investing in smart, clean and gender-sensitive public transport in Aqaba, to reduce carbon emissions and improve women's participation in the labour market	Jordan		 	
Aqaba-Amman water desalination and conveyance Building a desalination plant in the Gulf of Aqaba, in the Red Sea, which will distribute 300 million m3 of desalinated water every year all over Jordan			 	
Jordan Valley water resources Improving sustainability in the water sector, especially on the reallocation of water resources, through reforms			 	
Al Ghabawi wastewater treatment plant Helping to manage water resources sustainably and piloting innovative solutions to re-use treated wastewater for irrigation purposes			 	
West Irbid wastewater treatment plant Introducing wastewater connections and services to Irbid and the surrounding towns for the first time, replacing the current disposal system and positively impacting on the residents			 	
Special measure for water and sanitation Building water and sanitation infrastructure in Azraq refugee camps and its surroundings to cater for the needs of Syrian refugees and vulnerable Jordanians				
Jordan Water Security and Climate Adaptation Upgrading the network to reduce water losses, improve governance to fight illegal connections and improve financial sustainability of the sector			 	
Support to the border crossing at Al Karameh Building three operation rooms and one logistical hub for the Jordanian Armed Forces at the border crossing point of Al Karameh				
Quality education for vulnerable children and youth Providing education opportunities, including vocational training and higher education, to vulnerable children and youth in Jordan in the framework of the EDU-Syria Scholarship Programme

Support to public administration reforms Supporting progress in key areas of public administration, enhancing integrity, transparency and accountability	Lebanon		
Women Empowerment Hub (WE-HUB) Increasing women's leadership and participation in the political and public sphere, improving their engagement in the workforce and promoting legislative measures to protect women from all forms of violence			
Support to economic reforms Supporting the implementation of economic reforms, especially in fiscal policy and public financial management, linked to a future programme of the International Monetary Fund			
Improving living conditions, food security and resilience Supporting refugees and vulnerable local communities by reducing socio-economic insecurity, increasing sustainable production of key crops and increasing livelihood capacities with a focus on food security			
Improving living conditions and resilience Supporting vulnerable refugees and host communities to meet their basic needs and access social services while promoting livelihood opportunities, focusing on social protection			
Response to the multiple crises In the aftermath of the explosion of the Port of Beirut, supporting access to justice, socio-economic recovery, social inclusion and cohesion, disaster management and port governance			
Electoral reforms and democratic participation Ensuring compliant, fair, inclusive, representative and legitimate electoral processes and democratic participation, reinforcing the Lebanese Parliament and enhancing social cohesion			
Preventing and alleviating vulnerability and poverty Reducing socio-economic insecurity and developing an inclusive national social assistance system with a gender-sensitive focus, complementing the National Social Protection Strategy			
Securing access to quality primary health services Improving continued access to equitable, affordable and quality primary healthcare and strengthening access to medical products			
Support to local health centres and eradication of forced labour and exploitation Facilitating access to inclusive health for local communities and tackling all forms of forced labour and exploitation			
Support to wastewater and water public services Ensuring quality water and wastewater treatment services for both Lebanese and refugee communities, enhancing the capacities of the Government of Lebanon and raising public awareness			
Strengthening the water system Improving overall water governance by introducing monitoring systems for water extraction and upgrading all customer databases for the four Regional Water Establishments			
Support to essential water and sanitation services Contributing to the development of effective, reliable and self-financed public water and wastewater services for Lebanese and refugee communities			
Renewable energy for the Lebanese Armed Forces (Energy4Security) Installing renewable energy systems to maintain the operational level of the Lebanese Armed Forces and save more than 630 tonnes of CO ₂ emission each year			

Project

Project	Country	Sector	Partners
Digitalisation of the transport sector Digitalisation of payment systems, access to real-time information on traffic conditions and the personalisation of services for motorway network users	Morocco		 
Higher education, research and innovation and mobility Supporting ongoing reforms to meet the challenges of the country's social and economic situation, with a focus on employability of Moroccan graduates			
Decarbonisation and climate resilience programme Supporting the transition of Morocco towards a greener economy and society, accelerating decarbonisation and the greening of the energy and industrial sectors			 
Green energy investments Boosting transition to a greener economy and energy sector by supporting regulatory reforms, improving electricity market governance, power production and supporting reform to strengthen integration with the EU electricity market			
Innovative development in agriculture and forestry - "Al Ard al Khadraa" Supporting the green transition in agriculture and forestry in four different rural areas, creating jobs in both sectors			
Inclusive and sustainable forests Supporting investments in national parks and watershed management, especially in mountain regions, reducing flood and erosion and mitigating the effects of climate change			 
Support Programme for Social Protection – KARAMA Supporting specific actions to ensure a fair access for the Moroccan population to universal health coverage, family allocations, unemployment insurance and pensions			
Education in rural areas Building 150 primary schools in rural areas, reinforcing equal access to education and the quality of the public education system			 
Support Programme for Financial Inclusion Promoting a resilient economy and a more inclusive private sector growth			
Support to cultural and creative industries Supporting the development of an ecosystem of cultural and creative industries to create value and employment			
Reconstruction after the earthquake Providing support to individuals affected by the earthquake that struck in September 2023, relaunching public services and reviving economic activities and territorial cohesion			
Post-earthquake reconstruction Financing a number of multi-sector infrastructure projects to restore and improve the population's living conditions and to strengthen resilience of cities to natural disasters, as well as climate change			 
SMEs and mid-caps support Supporting SMEs and mid-caps affected by COVID-19 through Credit Immobilier et Hotelier			 
Women in Business (WiB) Credit Line Lending local currency to women-led SMEs, combining financing, technical assistance, risk mitigation and business advisory services			 

Project	Country	Sector	Partners
Technopoles Supporting the national Regionalisation Policy and Industrial Acceleration Plan, fostering economic development and integration of the industrial sector	Morocco 		 
Supporting medical equipment manufacturer Enhancing the capacities of a Moroccan producer of high-end medical garments			 
Supporting industrial production in the foam sector Enhancing the capacities of Dolidol, a leading producer of polyurethane foam and mattresses, towards greater representation of women across the business			 
Supporting the production of polypropylene bags Financing the construction of a new building for a company producing polypropylene bags, as well as enhancing current production			 
Public Support to enterprises Contributing to mitigating the effects of COVID-19 on SMEs through a loan to the Moroccan Ministry of Economy and Finance			 
Cooperation with the Mohammed VI Investment Fund Cooperation with the Mohammed VI Investment Fund, in particular on the structuring of private investment and the building of capacity to create sustainable jobs			
Automotive Mobility Supporting the construction of a new industrial facility dedicated to e-mobility components with a sustainable approach			 
Supporting microfinance Supporting Al Amana Microfinance, one of the largest micro-lenders in the country, to increase access to finance for smaller businesses, especially those run by women			 
Rehabilitation of the railway Renewing the existing conventional rail infrastructure and improving signalling, safety and flood protection			 
Improvement of the water system Supporting the National Office for Electricity and Potable Water in modernising and rehabilitating existing water networks and infrastructures			 
Extending and improving performance of water and sanitation services Extending access and improving the performance and resilience to climate change and health epidemics of the water and sanitation services managed by the Moroccan public utilities			 
Water for the Guelmim-Oued Region Improving drinking water supply in rural areas and upgrading four existing wastewater treatment plants as well as rehabilitating and extending water systems			 
Supporting migration management Ensuring a better management of the migration flows with respect of human rights and integration of migrants, in accordance with the National Strategy on Migration and Asylum (SNIA)			

Project	Country	Sector	Partners
Sustainable Use of Natural Resources and Energy Finance (SUNREF II) Guiding the private sector towards a greener economy, with a primary focus on green energy	Palestine*		 
Nasira Financing Facility Supporting local banks to lend to people usually considered too risky, like youth, women and migrant entrepreneurs			 
Sustainable Growth 4 All Aiming at enabling the uptake of green and sustainable investments and promoting access to finance and know-how for micro and SMEs, in particular female entrepreneurship and financial inclusion			 
Supporting SMEs after COVID-19 Financing the private sector with a credit line for local SMEs			 
Access2Finance Initiative Enhancing access to finance for SMEs, especially start-ups, youth- and women-led businesses			
SMEs Resilience Facility Financing eligible SMEs and mid-caps, contributing to economic resilience, employment-generating activities and alleviating the economic burden of COVID-19			 
COVID-19 Sustainability Programme Financing SMEs and mid-caps, contributing to economic resilience, employment-generating activities and alleviating the economic burden			 
Fostering Sustainable Economic Development Supporting key economic sectors that have the potential to stimulate economic growth, create jobs, welfare and contribute to the green and digital transformation			
Expanding trade at the border with Jordan Supporting the shipping of containers through the Allenby/King Hussein Bridge/Al Karameh border crossings to increase trade			  
Supporting Micro, Small and Medium-sized Enterprises Supporting small and medium businesses through the Stichting European Palestinian Credit Guarantee Foundation (EPCGF)			
Southern short-term low volume desalination plant Building a desalination plant in the Gaza Strip, providing safe water to around 500 000 people each day			
Northeast Ramallah Wastewater collection Building a new wastewater collection system for 14 municipalities, trunk lines leading to its solar photovoltaic panels to contribute to its energy needs

Project

Project	Country	Sector	Partners
Strengthening Food Resilience Mitigating the disruption of grain supply and of the food crisis generated by the Russian aggression in Ukraine by supporting the State-owned Cereals Office (ODC) in purchasing grain and modernising cereal storage and transport systems	Tunisia	Agriculture	
Sustainable Food Security Support Programme Supporting Tunisian cereal producers to reduce their production costs, reinforcing the National Institute of Field Crops' research and development capacities for a more sustainable agricultural production, and improving nutrition in schools through the national school food programme		Agriculture	
Post COVID-19 economic recovery Creating the conditions for a rapid, comprehensive and financially sustainable post-COVID recovery through support for social and economic mitigation measures and through support for the identification of an economic reform plan		Human Capital	
ELMED submarine electricity interconnection Deploying 220 km of undersea cable between Tunisia and Italy to develop cross-border trade of electricity and reduce CO ₂ emissions by more than 200 tonnes each year and the deployment of renewables in Tunisia		Energy	
Improving electricity transport and distribution Strengthening the electricity transmission infrastructure and the rehabilitation and extension of the distribution networks in Tunisia to integrate newly built generation capacity, and improve the quality and reliability of the electricity supply, as well as to connect 15 000 new households		Energy	
Environmental support action Improving the sustainability of the Tunisian economy and initiating its green transition through changes in consumer and producer behaviours as well as local development plans by municipalities			
Agricultural and rural development around water Providing infrastructure for storage, fair and sustainable distribution and more efficient use of water resources through water reservoirs in the Sidi Bouzid, Kairouan, Kasserine, Jendouba and Siliana governorates to reduce the pressure on scarce groundwater resources			
Green and digitally-fit schools Improving learning and teaching conditions for children enrolled in primary education all over the country, by building new primary schools and purchasing transport means and digital equipment		Human Capital	
SMEs economic recovery programme Contributing to the recovery, resilience, and growth of the Tunisian economy by enhancing access to finance for micro, small and medium-sized enterprises and mid-caps		Private Sector	
Corridor Sfax-Kasserine Upgrading the RN13 road section between Sfax and Kasserine for a total of 180 km - leading to the Algerian border - and contributing to safer and cheaper transport and regional connectivity by stimulating economic development in disadvantaged surrounding regions.		Transport	
Improving railway transport in Tunis Procuring 18 carriages for the tram line Tunis-Goulette-Marsa (TGM) to substitute old ones and improving availability and safety of urban transport	Transport		

Project

Project	Country	Sector	Partners
MEDUSA submarine optical fibre cable Constructing and deploying a 7 100 km-long submarine optical fibre cable network, connecting EU Member States with North African countries	Regional		 
Enhancing cyber security and cyber resilience Enhancing security cooperation with EU Member States and strengthening criminal justice capacities on cybercrime. Improving prevention, preparedness and response to cyber threats in compliance with human rights, gender equality and the rule of law			
Improving Justice and Security – Anti-corruption Region-wide support to the EU Southern Neighbourhood to improve anti-corruption policy and operational outcomes			
Support to democratisation Assisting new and existing pro-democracy actors and media through financial support and coaching and capacity-building			
Programme for Energy Efficiency in Buildings (PEEB Med) Supporting energy efficiency and climate resilience in buildings such as schools and health facilities, addressing technical barriers and the cost of energy-efficient construction or renovation			 
Mitigation Enabling Energy Transition in the Mediterranean region (MEETMED) Strengthening the implementation of energy efficiency measures and improving countries' energy mix through a multiscale, multi-partner and inclusive approach at local and regional levels, fostering regional cooperation			
Energy transition and energy security Facilitating the transition from fossil fuels towards clean energy			
Accelerating the clean energy transition for a greener and fairer economic recovery in the Southern Neighbourhood Contributing to a greener and fairer socio-economic recovery and enhanced energy security of partner countries through an accelerated clean energy transition at regional level			  
Green Economy Financing Facility Facilitating green investments by SMEs in Jordan, Tunisia and Lebanon			 
Sustainable economies Offering opportunities for the green, circular, and blue economies to support sustainable production and consumption			  
Support to Green and Circular Economy in the Southern Neighbourhood Upholding the green and circular economy to enable the policy and regulatory framework, support business-support organisations and support SMEs			   
Green Growth and climate action Supporting the external dimension of the EU's green transition			  
EuroMed Transport Programme on Maritime Safety – SAFEMED Supporting the establishment of an adequate regulatory framework for maritime transport for the benefit of the Southern Mediterranean partner countries			
Advancing Climate Adaptation (ACA-MED) Increased access to climate finance and action on adaptation to climate change through the Local Climate Adapting Living Facility (LoCAL)		  	

Project	Country	Sector	Partners	
Engaging Mediterranean Youth Enhancing youth engagement in policymaking and active citizenship. Addressing the challenges faced by youth not in employment, education, or training (NEETs), by making public policies more responsive to their needs	Regional			
Civil Society Facility Fostering and promoting functioning pluralistic and participatory democracy by increasing participation of civil society in policymaking and enabling it to cooperate with the EU				
Support to Culture as a requirement for human development Strengthening and enabling cultural actors to address global issues such as green and digital transition				
Support to economic governance Supporting economic reforms and macroeconomic management and strengthening capacities of civil society organisations on budgetary analysis, monitoring and advocacy				
Support to social economy and the Social Impact Fund Promotion of social economy as a vector for job creation and expansion of economic opportunities, for more inclusive economies			 	
Supporting Women's Economic Empowerment Supporting financial inclusion, access to finance and digitalisation of women entrepreneurs, as well as tackling the regulatory environment and skills development. Promoting women employment through a gender-responsive private sector development				
EU Initiative for Financial Inclusion The initiative and its five complementary regional facilities aim to expand financing to micro, small and medium-sized enterprises (including support to innovative start-ups)				    
Support to Green and Circular Economy Promoting an enabling policy and regulatory framework and supporting business organisations and Small and medium-sized enterprises (SMEs) on their transition towards a green and circular economy				
Support to Sustainable Trade Supporting sustainable development by taking into account the social, economic and environmental dimensions of trade, with a focus on digital trade and e-commerce				
Regional Trade and Investment Programme Ensuring transparent market information, strengthening trade and investment policies, optimising creation of employment, providing access to finance for SMEs, enhancing competitiveness, productivity and exports				   
Connected economies Supporting trade, transport and private sector development as key vectors for economic diversification, contributing to economic integration and connectivity				
Support to sustainable trade Contributing to decent job creation through sustainable trade, namely supporting sustainable development by taking into account the social, economic, and environmental dimensions of trade				

Project	Country	Sector	Partners	
Resource Efficiency including water and waste management and biodiversity Supporting water management in the water sector to mitigate climate change and address resource scarcity challenges	Regional 			
SEMPA project Protecting the biodiversity of the Mediterranean Sea and supporting the achievement of its good environmental status				
Fostering biodiversity, environment and climate action in the Mediterranean (BECA Med) Improving the integration of biodiversity protection and restoration into partner countries' sector policies while rolling out awareness campaigns				
Sustainable food systems, agriculture, and rural development Transitioning towards sustainable food systems contributing to rural development, better use of resources and protection of the environment				
Increasing protection and resilience of migrants and vulnerable people in Libya Providing protection, sustainable solutions and employment opportunities and improving social cohesion, with a focus on unaccompanied minors and young adults				
Support border management institutions in Tunisia and Libya Increasing regional cooperation and improving search and rescue activities through support to the State services and the development of the Maritime Rescue Coordination Centres and the Coast Guard Training Academies				
Migrants Protection, Return and Reintegration in the North of Africa (MPRR) Supporting vulnerable migrants to return to their countries of origin by providing them with tailored assistance covering their specific needs		 		   
Towards a Holistic Approach to Labour Migration Governance and Mobility (THAMM) Improving labour mobility and circular migration through support to policy and institutional frameworks and systems, vocational training, and mobility schemes				 
Reintegration of returnees in Tunisia and Morocco Ensuring the socio-economic reintegration of Moroccan and Tunisian migrants that return to their countries through access to basic services and protection, as well as supporting host communities		 		 
Support to Cross-Border Cooperation and Integrated Border Management Contributing to enhanced border security, safety, legal mobility and protection-sensitive approach to mixed migration flows through mutually beneficial cross-border cooperation				
Enhancing international police cooperation against migrant smuggling Strengthening the capacities of law enforcement agencies in the North of Africa to effectively investigate and prosecute organized crime groups engaging in migrant smuggling				
Support countries in the Southern Neighbourhood for the management of migration flows for 2023 Implementing a human rights-based migration governance, with a focus on protection, migration management, return and reintegration, legal migration. This regional action has also supported the implementation of the migration pillars of the Strategic and Comprehensive Partnerships with Egypt and Tunisia				  
MEET Africa – Phase 2 Promoting the creation of economic activities and jobs by accompanying and supporting the members of the diaspora in returning and investing in their country of origin
