

EU SUPPORT TO KOSOVO

INVESTMENT INSTRUMENTS

EUROPEAN UNION
The largest provider of financial assistance to Kosovo

The **Western Balkans Investment Framework (WBIF)**, including its private sector platform the **Western Balkans Enterprise Development and Innovation Facility (WB EDIF)**, gathers Western Balkans partners, bilateral donors and International Financial Institutions in support of the region and individual countries growth and convergence. The WBIF was created in 2009, with the European Union as major donor through the Pre-Accession Assistance Instrument (IPA).

The **Pre-Accession Assistance (IPA II)** also provides additional funds as bilateral grants directly to Kosovo, to support projects in the fields of transport, energy, environment, competitiveness, innovation and capacity building.

The **Economic and Investment Plan for the Western Balkans**, adopted by the European Commission on 6 October 2020*, aims to spur the long-term economic recovery of the region, to support a green and digital transition, to foster regional integration and convergence with the European Union. The plan sets up a substantial investment package in support of sustainable connectivity, human capital, competitiveness and inclusive growth, and the twin green and digital transition. The investment package will be a key driver for facilitating increased public and private investments in the region by European and international financial institutions.

*COM(2020)641 final

	WBIF grants 2009 - 2020	IPA II bilateral grants 2014 - 2020
Transport	€101.9m	–
Energy	€22.6m	€136m
Environment	€21.9m	€27m
Social	€1.8m	€73.1m
Digital infrastructure	€1.2m	–
Competitiveness and innovation including agriculture	Breakdown of support provided below	€106.8m
Total	€149.4m	€342.9m
EU support to Kosovo	WBIF grants + IPA II bilateral grants: €492.3m	

"WBIF projects are changing the quality of life in Kosovo. The water supply and district heating have provided Pristina with 24/7 water and lower bills. The Railway Route 10 and Peace Highway will integrate Kosovo into main transport networks."

Ambassador Tomáš Szunyog
Head of EU Office and EU Special Representative to Kosovo

*This designation is without prejudice to positions on status, and is in line with UNSCR 1244/1999 and the ICJ Opinion on the Kosovo declaration of independence.

WBIF AND KOSOVO

KOSOVO AND THE WESTERN BALKANS INVESTMENT FRAMEWORK (WBIF)

The WBIF has been instrumental in effecting key improvements in the everyday lives of the citizens in Kosovo by:

- Creating key road and rail transport links with neighbouring countries;
- Implementing energy efficiency measures in public buildings throughout the country;
- Rehabilitating the district heating system in Pristina;
- Ensuring access to efficient water and wastewater services;
- Improving flood protection and mitigation measures;
- Upgrading education and healthcare facilities.

Results

- 53 km of motorways
- 213 km of railway lines rehabilitated
- District heating systems for 1.2 million people
- Improved water/wastewater systems for 1.2 million people
- Healthcare treatment and research facilities for 1.3 million people
- 136,500 students and teachers in 500 schools connected to high-speed broadband

In Kosovo, the WBIF also supports private sector competitiveness and innovation (including agriculture) with blended investments (grants and loans) through the following instruments:

WB EDIF • financing for SMEs	€72.6m
EFSE • sub-loan investments	€297.1m
GGF • sub-loan investments	€10.5m
Total	€380.2m

WBIF GRANTS	Investment grants: €111.8m
€149.4m	Technical assistance: €35.1m
SIGNED LOANS	SUPPORT TO PRIVATE SECTOR
€255m	€380.2m
ESTIMATED PROJECT VALUE	PROJECTS SUPPORTED
€1.4bn	28

Data as of June 2020

SME access to finance and competitiveness

Western Balkans Enterprise Development & Innovation Facility (WB EDIF)

The WB EDIF provides diversified access to finance for small and medium enterprises (SMEs) via a range of financial instruments, accompanied by advisory services to boost the SMEs investment readiness.

European Fund for Southeast Europe (EFSE)

The EFSE fosters economic development through the provision of finance to intermediate lending institutions that on-lend to micro and small enterprises (MSEs), farmers, agro-businesses, and households.

Private sector energy efficiency and renewables

Green for Growth Fund (GGF)

The GGF finances renewable energy projects through the provision of finance to intermediate lending institutions that on-lend to MSEs and private households.

Regional Energy Efficiency Programme (REEP/REEP Plus)

The REEP/REEP Plus provides a combination of financing instruments to municipalities, SMEs and households for the sustainable energy efficiency projects.

WBIF PUBLIC SECTOR • Blending investments for major infrastructural projects

Orient/East-Med Corridor: general rehabilitation of Route 10 Phase 1, Fushë Kosovë/Kosovo Polje - border with North Macedonia railway section

Energy efficiency measures in central public buildings

The Orient/East-Med Corridor (R10) crosses Kosovo from the north to the south, from the border with North Macedonia to Serbia, and constitutes Kosovo's sole connection to the region by rail. The entire track is in poor condition, with serious structural limitations that do not allow for traffic in excess of 60km/h and in some areas 20 km/h. This investment project – supported by WBIF – will enable outdated switches, tracks, bridges and tunnels to be replaced or renovated. This project is expected to yield significant benefits including (i) secure and efficient rail transport for approximately 50% of the population of Kosovo; (ii) passenger and cargo rail capacity and travel time significantly improved; and, (iii) reduced CO₂ emissions.

The Energy efficiency and renewable energy project will reduce energy consumption and fossil fuel use in public buildings through energy efficiency and renewable energy investments and enhance the sustainable energy policy and regulatory environment in Kosovo. It includes three components: (i) clean energy investments in public buildings; (ii) policy and regulatory support for clean energy; and (iii) project implementation support.

EU grants: €42.2m; EBRD grant: €1m

Bilateral donor grant: €0.7m

EBRD loan: €19.2m; EIB loan: €20.9m

WBG loan: €27.7m

Total investment: €83.3m

Total investment: €28.4m

Pristina regional water supply project

Kosovo education improvement project

Pristina's water supply system suffers significantly from leakages and from unbilled and uncollected tariffs. These factors have led to a poor quality of service and difficult financial circumstances. Leakages are estimated at 50% and revenues collected also represent only about 50% of their potential. To redeem these issues, the WBIF project comprised the construction of two small reservoirs, pipe replacement, meter installations and improvements of household. These investments are currently reducing water losses in the network and improving the sustainability of the system's water supply connections for approx. 700,000 new and existing customers in Pristina and the surrounding area.

The Kosovo education system serves nearly 1.5 million pupils, but it struggles to provide adequate curricula, instruction and a teaching and learning environment to produce the skills that the evolving labour market requires. Enrolment rates for secondary education stands at 88% for girls and 92% for boys. Despite progress, disparities still exist in access to education. To aid this, WBIF provided a grant that assisted the Ministry of Education, Science and Technology in developing an education information database, preparing a study to identify the main constraints facing girls' education issues, and undertake a needs assessment for in-service teacher training. These interventions have enabled better investment planning in the education sector.

EU grants: €11.2m

Bilateral donor grant: €0.5m

KfW loans: €26m

Total investment: €52.3m

Total investment: €0.5m

WBIF PRIVATE SECTOR • Access to finance and competitiveness, energy efficiency and renewables

WB EDIF Western Balkans Enterprise Development and Innovation Facility
wbedif.eu
Western Balkans Enterprise Development & Innovation Facility

GREEN FOR GROWTH FUND
ggf.lu
Green for Growth Fund*

Objective: Improve capacity and access to affordable finance for companies in the Western Balkans.

The Western Balkans Enterprise Development & Innovation Facility (WB EDIF) is the EU-led platform for private sector development in the Western Balkans. It unites key stakeholders including the Western Balkan governments, IFIs, regional organisations, and bilateral donors to pull and leverage together financing and expertise. WB EDIF provides diversified access to finance for small and medium enterprises (SMEs) via a range of financial instruments (i.e. guarantees, equity and loans). This is accompanied by advisory services to boost the SMEs investment readiness and support for policy reforms in the region.

- €72.6m in financing for SMEs ✓
- 584 SMEs supported in Kosovo ✓
- 4 equity investments (€3.6m) ✓
- Technical assistance and advisory to SMEs for €3.3m ✓

Objective: Support regional measures to cut energy use and CO₂ emissions by 20%.

Under the same structure than EFSE, the Green for Growth Fund (GGF) finances renewable energy projects. Intermediate lending institutions on-lend to micro and small enterprises (MSEs) and to private households. The Fund has a special focus on energy efficiency and renewable energy investments. Its Technical Assistance Facility supports MSEs to prepare investment projects and builds the capacity of intermediate lending institutions. The initiators of the GGF are the European Investment Bank (EIB) and Germany's KfW Development Bank.

- €10.5m sub-loan investments ✓
 - 2,592 sub-loans ✓
 - 20,033 MWh/yr primary energy savings ✓
 - 5,195 tCO₂/yr emissions reduction ✓
- *Number and amount of sub-loans since inception

EFSE
efse.lu
European Fund for Southeast Europe*

Objective: Provide sustainable funding to micro and small enterprises and low-income families.

The European Fund for Southeast Europe (EFSE) is an EU supported public-private fund fostering economic development through the provision of finance to intermediate lending institutions that on-lend to MSEs, including farmers and agro-businesses, and to private households. Its development facility provides technical assistance to build the capacity of the entrepreneurial ecosystem (e.g. entrepreneurs, financial institutions, public institutions). KfW is the initiator and lead investor of the Fund.

- €297.1m sub-loan investments ✓
 - 89,858 sub-loans provided ✓
 - 80 advisory projects supported ✓
- *Number and amount of sub-loans since inception

REEP/REEP Plus
wb-reep.org
Regional Energy Efficiency Programme for the Western Balkans**

Objective: Create a sustainable market for energy efficiency in the Western Balkans.

The Regional Energy Efficiency Programme for the Western Balkans (REEP/REEP Plus) provides a combination of financing instruments, technical assistance and policy dialogue to address market barriers and stimulate longer-term market development. Implemented by the European Bank for Reconstruction and Development (EBRD), the Energy Community Secretariat and KfW with the support of the EU and other bilateral donors, the programme supports the improvement of the regulatory environment for investments in energy efficiency, sustainable and renewable energy. It also facilitates access to finance to municipalities, SMEs and private households.

- €140m on-lent for project financing ✓
 - 20,000 households receiving finance ✓
 - Improved energy efficiency ✓
- **Regional results

The start-up company Labbox received equity financing and advisory services financed by the EU, in cooperation with EBRD and European Investment Fund (EIF) to develop a learning tool for children on how to code. The Labbox curriculum is based on several modules – each segment introduces a new concept in technology and encourages users to experiment. Public schools across Kosovo have already piloted the Labbox curriculum.

A leading biscuit producer in Kosovo needed investments to decrease energy consumption, in order to improve quality and process efficiency, all of which enhances competitiveness. The GGF financed the new oven and a new biscuit production line. The €49,000 investment allowed the company to decrease its electricity and water consumption by more than 50%. This means the investment will be repaid in approximately six years.
